

AKILAN K T - Senior Databricks Data Engineer | Multi-Cloud (Azure & AWS)

Phone: +91-9489882412 | Email: ktakilan07@gmail.com | LinkedIn: [linkedin.com/in/akilan-k-t-546ab31b5/](https://www.linkedin.com/in/akilan-k-t-546ab31b5/)

Location: Chennai (Preferred - Bengaluru/Chennai/Hyderabad/Pune)

PROFESSIONAL SUMMARY

Modern Data Engineer with **4+ years** of expertise in architecting **Cloud-Native Data Platforms** using **Databricks Lakehouse, PySpark, and Delta Lake**. Specialist in **Unity Catalog governance, Delta Live Tables (DLT)**, and high-performance Spark optimization (**AQE, Skew Mitigation, Liquid Clustering**). Proven track record in driving ROI through **automated data quality frameworks** and cost-optimized infrastructure in multi-cloud (Azure/AWS) environments.

TECHNICAL CORE COMPETENCIES

Modern Data Stack: Databricks (Azure/AWS), PySpark, Delta Lake, Unity Catalog, Delta Live Tables (DLT), Python, Spark SQL, CI/CD (Azure DevOps/Jenkins/DABs), Microsoft Fabric (OneLake), Azure Data Factory (ADF), Auto Loader, Volumes, ADLS Gen2, AWS S3

Quality & Observability: Monte Carlo, Great Expectations, Schema Drift Monitoring, Automated Anomaly Detection, Data Contract Enforcement

Legacy Modernization & Databases: Informatica PowerCenter, Trino, Fivetran, Airflow, Control-M, PostgreSQL, SSMS (SQL Server), Oracle, Teradata, Exasol, Redshift, Athena, Synapse Analytics

Leadership & Strategy: Mentorship, Cross-Functional Collaboration, Stakeholder Management, Agile/Scrum

PROFESSIONAL EXPERIENCE

Senior Databricks Data Engineer | GUARDIAN LIFE (Oct 2025 – Present)

- Architected and led the transition to a high-performance **Databricks Lakehouse architecture**, delivering a **20% infrastructure cost reduction** and enhanced data accessibility through the modernization of 252+ legacy tables.
- Implemented data observability using **Monte Carlo** for anomaly detection and **Great Expectations** for inline validation, **cutting MTTR by 50%**.
- Applied industry-leading Spark performance optimizations including **Adaptive Query Execution (AQE)**, **dynamic partition pruning**, **broadcast joins**, and **skew mitigation**, **accelerating job completion by 25%**.
- Configured **Unity Catalog** to manage workspace permissions, data governance, lineage, and fine-grained access control across **250+ Delta tables**.
- Built high-throughput ingestion pipelines using **Auto Loader** and **Fivetran** to ingest data from Aurora PostgreSQL, Oracle, and SQL Server into Delta Lake.
- Optimized Delta Lake storage and query speed using **Liquid Clustering**, **Z-Ordering**, **VACUUMing**, and predictive optimization strategies, **reducing storage footprint by 15%**.
- Orchestrated workflows using **DABs** and **Control-M**, with **Jenkins** for automated CI/CD.
- Executed parallel runs using **Databricks Genie** for automated validation of row counts, schema mapping, key integrity, and transformation logic.

Azure & AWS Databricks Data Engineer | INFOSYS (Oct 2022 – Sep 2025)

- Engineered a scalable **Modern Data Platform** on **Microsoft Fabric** and Azure Databricks, modernization effort **handling 2TB of enterprise data** previously hosted in legacy SSMS environments.
- Architected **Gold-layer business reporting models** on Databricks Lakehouse as part of a strategic legacy modernization initiative from Exasol databases.
- Developed scalable PySpark/ADF pipelines, **improving efficiency by 40%** and reducing maintenance by 15%.
- Engineered multi-cloud integration for structured/semi-structured data across **AWS S3, Redshift, Athena, Kubernetes, MinIO, and Trino**.
- Used **Great Expectations** for data quality and automated monitoring, reducing pipeline failures by **20%**.

CERTIFICATIONS

- Databricks Certified Data Engineer Professional
- Databricks Certified Data Engineer Associate

EDUCATION

B.E. ECE, Anna University (2022), CGPA: 8.01
