## EXPERIENCE

---

### Dream IT Consulting Services

*Data Analyst / Data Engineer | Jan 2025 - Present*

*Data Analyst Intern | Microsoft Fabric, Power BI, SQL, PySpark, Git | Sept 2025 - Dec 2025*

- Architected metadata-driven Microsoft Fabric pipelines with dynamic configuration and watermark-based incremental loading, reducing manual pipeline configuration by 50%.
- Built Medallion Lakehouse architecture (Bronze, Silver, Gold) using Microsoft Fabric, PySpark, Spark SQL, and Delta Lake for scalable enterprise data processing.
- Engineered 20+ reusable PySpark notebooks for data cleansing, deduplication, and audit logging, reducing ETL development effort by 40%.
- Optimized SQL queries, Spark transformations, and Fabric semantic models, improving pipeline execution time and Power BI refresh performance by 35%.
- Built interactive Power BI dashboards and semantic models using DAX, SQL Endpoints, and Row-Level Security (RLS) for self-service analytics.
- Used Git for version control across Fabric notebooks and pipeline configurations, and collaborated with QA and stakeholders through production release.

## PROJECTS

---

### Thomas Preti | Multi-Source Data Integration

*Microsoft Fabric, Python, PySpark, REST APIs, Microsoft Planner, Nowsta, Caterase, Delta Lake, Power BI, Git, CI/CD*

- Built multi-source ingestion pipelines in Microsoft Fabric integrating Microsoft Planner, Nowsta, and Caterase via REST APIs and reusable Python frameworks.
- Implemented incremental loading, pagination, authentication, and rate-limit handling using a centralized variable library for secure configuration management.
- Developed reusable PySpark transformation and validation processes for schema handling, deduplication, and source-to-target reconciliation.
- Managed Git version control and branching, and set up deployment pipelines promoting Fabric items across Dev, Test, and Production workspaces.

### Boston Insights | Azure Data Platform to Microsoft Fabric Migration

*Microsoft Fabric, Azure Data Factory, PySpark, Delta Lake, Power BI*

- Migrated enterprise ETL workloads from Azure Data Factory to Microsoft Fabric, redesigning ingestion pipelines with metadata-driven orchestration.
- Built Medallion Architecture using PySpark and Spark SQL, implementing dynamic watermark processing, deduplication, and reusable transformation notebooks.
- Published curated Gold-layer datasets via Fabric SQL Endpoints and built Power BI semantic models with DAX, reducing processing time by 35%.

## CERTIFICATIONS

---

- Microsoft Certified: Fabric Data Engineer Associate (DP-700)
- Microsoft Certified: Fabric Analytics Engineer Associate (DP-600)

## TECHNICAL SKILLS

---

**Data Engineering:** ETL/ELT, Data Pipelines, Lakehouse & Medallion Architecture, Metadata-Driven Pipelines, Incremental Loading, Data Quality, Governance

**Microsoft Fabric:** Fabric Pipelines, Lakehouse, OneLake, Notebooks, SQL Endpoint, Semantic Models, Dataflows Gen2, Data Factory, Warehouse

**Programming & Query Languages:** SQL, T-SQL, PySpark, Python, Spark SQL, DAX, REST APIs

**Cloud & Storage:** Azure Data Lake Storage Gen2 (ADLS Gen2), Delta Lake, Parquet

**DevOps & Version Control:** Git, GitHub, Azure DevOps, CI/CD, Deployment Pipelines

**Data Modeling & BI:** Star Schema, Dimensional Modeling, Power BI, Row-Level Security (RLS), Report Optimization

## EDUCATION

---

**Seth Jai Parkash Mukand Lal Institute Of Engineering And Technology**

*B.Tech in Computer Science (CGPA: 7.2/10) | 2021 - 2025*
